

Custom Fabrication

When you need sanitary or BPE fittings, valves, tubing, strainers, spools or other specialty products that are not standard catalog items, simply ask us about our custom capabilities.

Concept

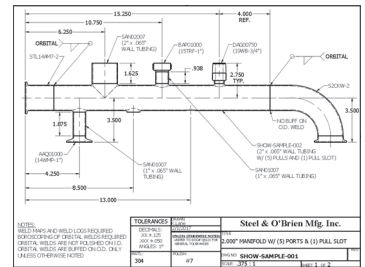

Steel & O'Brien manufactures custom sanitary fittings up to 12". We have the ability to make dimensional variations of the products offered in our catalog, but we can also completely manufacture original products.

- We can use any drawing/idea as a starting point for your design.
- We provide approval drawings within 24 hours of receiving an order.

Engineering

- We have the latest 3-D CAD/Cam Software
- We have a full-time engineering staff with over 60 years of experience.

Fabricating/Machining

- Our AWS D18.1 certified welders can fabricate tubular assemblies from 1/2" up to 12" O.D.
- Orbital welding with coupon readouts are available for high-purity welds 2" and under that require no additional finishing.
- In-house fabricating, machining (19 CNC lathes and 5 mills), finishing & polishing, welding inspection and documentation.

Quality

- We perform in-bound inspection on all of our parts before we even begin the manufacturing process.
